📱 Ikman.lk Clone App (React Native + Expo)

📝 Project Description

Ikman.lk Clone App is a simple React Native mobile application built for beginners.
The app allows users to:

Browse categories (like Cars, Electronics, Jobs, Property).

- View product listings under each category.

- Open product details to see price, image, and description.

- Navigate through different screens using a Bottom Tab and Stack Navigator.

This project demonstrates **React Native fundamentals** such as:

- Components

- Props and State

- FlatList for lists

- React Navigation (Stack + Bottom Tabs)

📄 Assignment Description

Project Title: Ikman.lk Mobile App (Clone)

Description:
This project is a **React Native mobile application** developed as a beginner-level
assignment. The main objective of this app is to create a **clone version of Ikman.lk**, which
is one of Sri Lanka's most popular classified advertisement platforms.

Users will be able to:

- **Download and use the app** on their mobile phone.

- **Browse categories** such as Cars, Electronics, Jobs, and Property.

- **View product listings** with details such as title and price.

- **Navigate** between Home, My Ads, and Profile using a Bottom Tab Navigator.

- **Check product details** like price, description, and basic information by clicking on
  a product.

This project is designed only with **dummy data (no real backend)** to demonstrate the **UI and navigation flow** of the Ikman.lk application. It highlights the use of **React Native components, FlatList, props, state management, and React Navigation**.
